

Make Better Business Decisions With Centralized Reporting and Analytics

Get a complete picture of your business data on any device that supports a browser. With Centaman's all-in-one software, you'll have powerful built-in business reporting and analytics that seamlessly offer actionable, data-based insights. Easy access to data holds the keys to greater operational efficiency, increased profits, enhanced guest experiences, and more.

Reporting Solutions Built For Attractions

Comprehensive Data Management

Our platform gives you the tools to manage ticket sales, memberships and season passes, access control, inventory management, customer relationship management (CRM), point of sale (POS), and more. Generate data from each part of your business, individually or together, to optimize operations and plan future success.

Preconfigured Dashboard & Reports

Guests should be at the top of your focus, not database management and data science. Our business reporting includes preconfigured dashboards based on industry best practices with hundreds of report templates. Need a custom report? Our drag-and-drop interface makes it easy to tailor data to your needs.

Automated Reports

If you or your team members pull reports at a specific time each day or day of the week or month, Centaman allows you to schedule them efficiently and conveniently. Choose a report that a specific user needs, set the time for delivery, and Centaman does the rest, time after time. Give your team access to the data they need right when they need it.

Additional Reporting Features

- Restricted access based on role
- Financial exports for third-party integrations
- Report categories to match your operational needs
- Custom report building
- Split-revenue reporting
- User-friendly drag-and-drop solution
