Streamline Retail, Food, & Beverage Sales

With All-In-One Attraction Management Software

Ensure your guest experiences are consistent throughout your attraction with an all-in-one point of sale (POS) system. Built for retail, food, and beverage environments, our POS system enhances operational efficiency and allows you to train your team members on one platform. Make sales from anywhere with a tablet POS system and even let your customers place orders themselves through a mobile app or self-service kiosks.

Point of Sale Solutions Built For Attractions

Multi-Store Management

Manage multiple stores, cafes, warehouses, and suppliers across your entire attraction with unified POS software. Our solution is flexible enough to allow you to offer different menus or easily adjust pricing at different venues across all locations. Also, quickly view detailed reporting on spending trends, and manage inventory from one system.

Mobile & Self-Service Ordering

Free guests from long lines and create more time for fun with our mobile POS system. Our solution makes it convenient for your staff to set up additional checkouts on a tablet POS. Or, offer guests the option to order on their own time via an app or at a kiosk.

Why Your Guests Will Love Our Point of Sale Solutions

- ✓ Fast and secure transactions
- ✓ User-friendly app and kiosks for easy mobile ordering
- ✓ Portable tablet POS systems to keep lines short
- ✓ Personalize the experience by offering unique promotions
- ✓ Automatic redemption or manual entry for discounts and coupons
- ✓ Seamlessly accept multiple payment methods
- ✓ Streamlined inventory management so bestsellers are always in stock

Tablet POS System

Keep lines short, even on your busiest days, utilizing a portable tablet POS system with line-busting capabilities. Our easy-to-use tablet systems make it easy for your staff to quickly switch from inventory management to check-out mode so they can change tasks without disruption. In addition, easily open pop-up retail shops for limited-time attractions.

Inventory Management

With a retail, food, and beverage inventory module built into our POS software, your employees can seamlessly handle purchase orders, delivery dockets, and vendor management tasks, including multi-store setup, transfers, and stocktakes. With detailed reporting, you can view spending trends and manage all your inventory from one system.

Discounts & Promotions

Enhance guest experiences by offering discounts and promotions specific to the menu or retail item, day, or time. Our POS system accepts coupons and discount codes for both members and day guests. When you utilize the same system throughout your operation, you can instantly recall guest information, apply discounts, and track sales to personalize the experience.

Cashless Payments

Encourage guests to spend by accepting in-park cashless payments, such as using RFID devices to draw on stored value accounts. Guests can add funds, share accounts with family members, and set daily spending limits to ensure everyone can purchase a souvenir or stop for a bite or drink between rides, tours, or visiting attractions.

Additional POS System Features

- All-in-one POS and management software for faster training
- High-speed touchscreen
- Accept cash, credit, debit, gift cards, cashless, and foreign currency
- Streamlined upselling and cross-selling
- Ticket, concessions, and retail packages
- Inventory control for pop-up and multi-location stores
- Manage staff with granular admin access
- Multi-sale, stock adjustment, and stock transfers
- Real-time inventory counts and alerts for limited quantities
- Multiple menus for different venues
- Pre-build multi-sale combination meals

centaman

We strive to ensure our software helps customers deliver a better guest experience and operate more effectively from the onset with a dedicated project manager and 24/7 support team. Our out-of-the-box solution is loaded with powerful features, and our scalable solution has the flexibility for custom development and integrations.
